

Interaction points

Worksheet

Activity:

An interaction point is the moment in which the user performs an action, the system responds, and the user reacts. (The system can also initiate an action, followed by the user's action, and the corresponding action by the system.)

Look through your interviews and identify the most interesting interactions. This is a fine-grained analysis: describe and sketch what happened at each step so that someone else can understand it. Include what the user wanted to do,

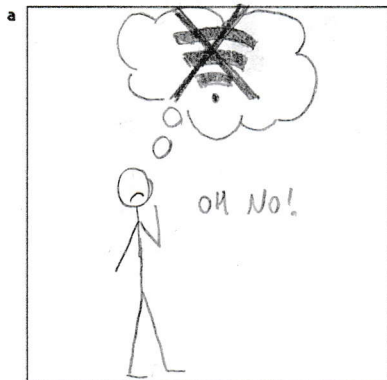

how they interacted with the system to accomplish it (or not), and how they reacted to the result.

Choose the interaction points from your story interviews. Note that a simple button press to launch a function is rarely interesting. Instead, look for situations that involve more complex sequences of interactions and results. These interaction points translate directly into video brainstormed ideas and will form the key elements of a story-based video prototype.

Interaction point: Titlecard

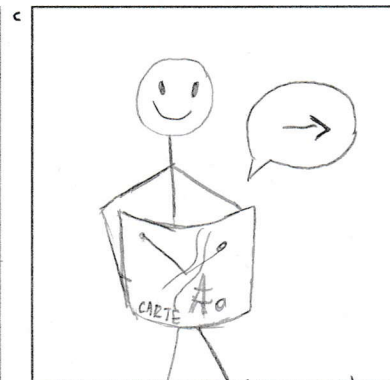

Carte off line

L'utilisateur va passer
et n'aura pas de la connexion
internet quand il arrive.
Il veut quand même
utiliser les cartes

Il utilise son ordinateur
pour télécharger de cartes
et les imprimées pour
les utiliser physiquement.
Il est forcé de se préparer
des jours en avance.

Il arrive à le trouver et
utilise les cartes imprimées
pour trouver son chemin.
